VIRUS

¡Un mundo microscópico para pintar!

*Un proyecto elaborado por el Centro de Comunicación
de las Ciencias de la Universidad Autónoma de Chile,
con ilustraciones de Biólogo ilustrador*

VIRUS

¡Un mundo microscópico para pintar!

Para cuidarnos entre todos y todas, lo mejor es quedarnos en casa
¡y qué mejor que pasar el rato pintando!

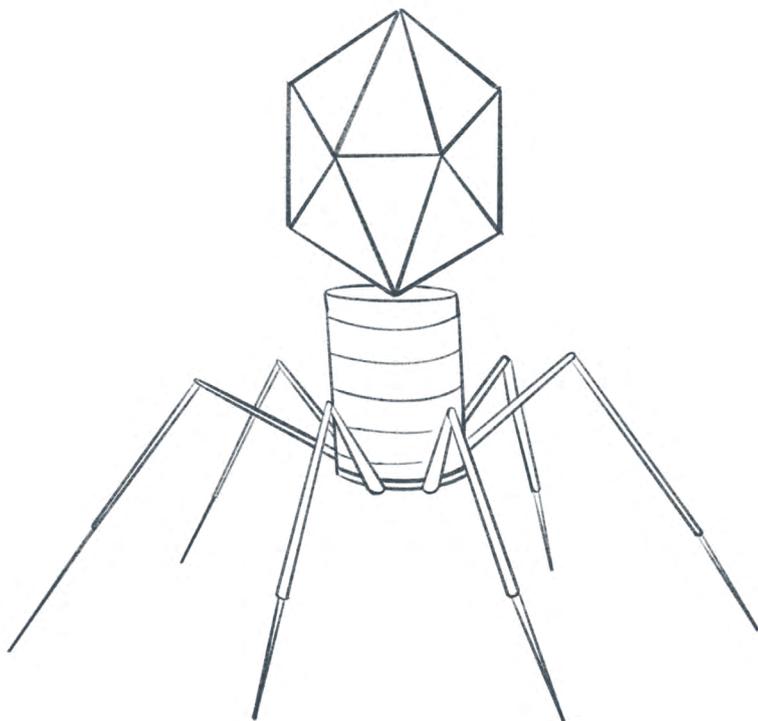

A continuación, encontrarás 26 dibujos de algunos de los virus
más conocidos en el mundo –incluido, por supuesto, el tristemente
célebre SARS-CoV-2 (también llamado “coronavirus”)– para
colorear como tú quieras.

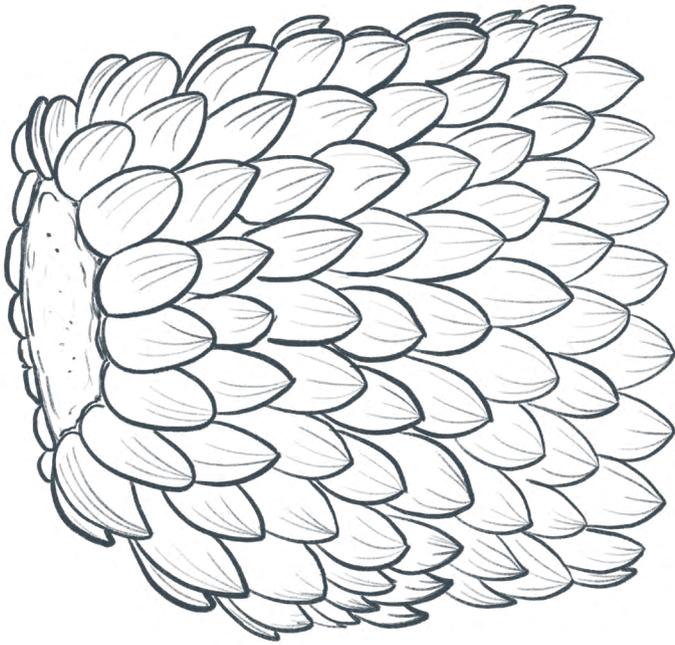

Y si quieres saber más de ellos, escanea el código QR y descarga
gratuitamente el libro **Virus, un mundo microscópico**, en él podrás
enterarte de qué son los virus, cómo son, qué tipos hay y sus
características.

¡Diviértete y aprende!
